Group socialization is the theory that an individual’s peer groups, rather than parental figures, influences his or her personality and behavior in adulthood. Adolescents spend more time with peers than with parents. Therefore, peer groups have stronger correlations with personality development than parental figures do.

This handbook focuses on organizational socialization, or the process through which individuals acquire the knowledge, skills, attitudes, and behaviors required to adapt to a new work role. This chapter launches the handbook by defining organizational socialization, differentiating this term from the related concept of onboarding. The importance of organizational socialization is discussed, and the major sections and contributions of this handbook are outlined.
